Education

Swaminarayan University, Surat, Gujarat

2025 – 2029

Bachelor of Engineering in Computer Engineering | Current Semester: 3 | **Sem 1: 9.0** | **Sem 2: 8.8**

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming

Technical Skills

Languages: C++, JavaScript, typescript, python

Frontend: HTML, CSS, React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, SQL

Authentication & Tools: JWT, Git, GitHub, Docker

Experience

Freelance Full Stack Developer

2026

MERN Service Booking Platform – Client Project

- Developed and deployed a MERN-based service booking platform for a real business client, taking the application from development through production deployment.
- Built frontend, REST APIs, authentication, service management, booking workflows, database operations, administrative functionality, and deployment.

Projects

Shruviq – AI-Powered Customer Experience Platform

GitHub

Team Leader & Full Stack Developer | Hack-Aarambh 2026 – 2nd Runner-Up

- Led the team while personally developing the analytics dashboard, integrating AI services, and handling deployment for a platform that converts customer text and voice feedback into business insights.
- Built dashboard visualizations for customer sentiment, emotional trends, aggregate scores, and staff-performance insights.
- Integrated Groq, Llama 3.3, and Whisper for AI-driven sentiment analysis and speech-to-text; pitched the solution to judges.

Academizer – AI-Powered Academic Management Platform

GitHub

Team Leader & Full Stack Developer | CRAFTATHON 2026 – Finalist

- Led the team and handled most of the development for a platform designed to reduce teachers' administrative workload and provide centralized insights across classes and students.
- Built academic management features using React.js, Tailwind CSS, Node.js, Express.js, and MongoDB, including attendance, student records, analytics, AI-powered insights, and automated PDF reports.

MERN E-Commerce Platform

GitHub

Personal Project | Sole Developer

- Independently developed a full-stack e-commerce platform using MongoDB, Express.js, React.js, and Node.js.
- Implemented JWT authentication, password hashing, product CRUD, search and filtering, cart functionality, REST APIs, and administrative product management.

Certifications & Participation

- Solutions Architecture Job Simulation** – AWS & Forage
- Odoo x Adani Hackathon '26** – Participant
- ICETAI 2026** – Certificate of Participation; team member of the MedSentry research project.
